

Series 5000

Snap-Lock Detail

TEFLON® is a registered trademark of DuPont™ used under license by Nu-Ray Metal Products, Inc.

Nu-Ray's 12" Series 5000 "Snap Lock" metal roofing panel is a concealed fastener, self-locking panel for roof and wall applications.

Panels are available with pencil ribs (shown above) or striations.

The 1" tall standing seam design has a classic look with the durability needed for a weather-tight application.

Fastening slots help provide for thermal movement and ease of panel application without clips, giving you the performance you need at an affordable price.

NRM offers a full palette of cool color options featuring either top-of-the-line 26 gauge Nu-Shield™ with Teflon® surface protector or 24 gauge PPG ULTRA-Cool™ Kynar 500® paint finishes. Zinalume Plus is available in 26 and 24 gauge; in .032 or .040 aluminum; and in 16 oz. or 20 oz. copper.

G-90 level galvanized base metal is standard in 26 and 24 gauge materials.

Minimum 3/12 pitch is recommended.
